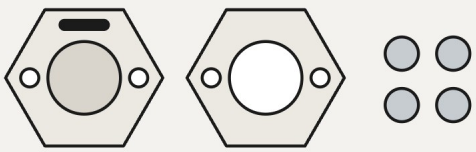
MAKER CULTURE 3D

Hexagon Medal Display

Magnet assembly guide · about 10 minutes

The magnets are packed separately so they arrive safely. Each hexagon has a **base** (goes on the wall) and a **lid** (holds the medal). Two magnets go in each.

In the box · per hexagon

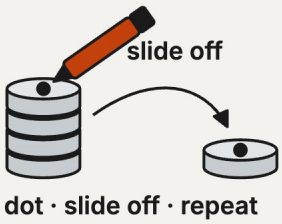


Base · Lid · 4 magnets

+ double-sided tape for the wall

You will need: ☐ **Super glue** (not included) ☐ **Permanent marker** ☐ Paper to work on

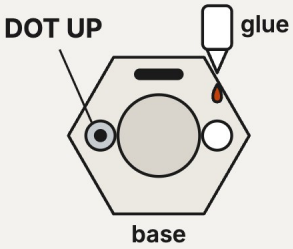
1 Mark the magnets



dot · slide off · repeat

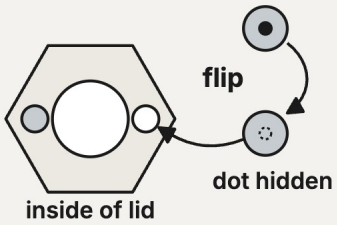
Keep the magnets in one stack and don't flip it. Dot the top magnet, slide it off, dot the next. Repeat until all have a dot.

2 Base: dot UP



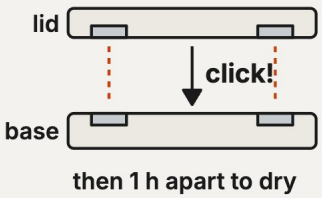
A small drop of super glue in each of the 2 base holes. Press a magnet in, **dot facing up**, until flush. Hold 30 seconds.

3 Lid: dot DOWN



A small drop of glue in each of the 2 holes inside the lid. Press a magnet in with the **dot facing into the hole**. Hold 30 seconds.

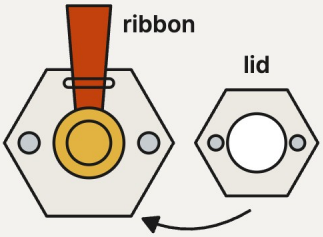
4 Test, then dry



then 1 h apart to dry

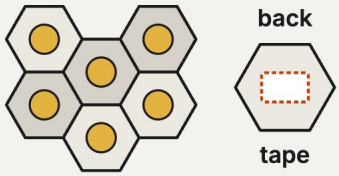
After 1 minute the lid should snap onto the base. **Pushes away?** Flip that magnet while the glue is soft. Then dry 1 hour, **lid and base apart**.

5 Add your medal



Lay the medal in the round recess of the base, ribbon up through the top slot. Close the lid – the magnets hold it flat and straight.

6 Stick it to the wall



any shape you like

Wipe the wall clean and dry. Put tape on the back of each base and press firmly for 30 seconds. No drilling needed.

Good to know

- ⚠ **Keep magnets away from children and pets.**
- Tiny glue drops only – too much can seal the lid.
- Tape needs a smooth, clean wall (no wallpaper).
- Keep magnets away from bank cards.
